## Start increasing productivity and lower your costs!

SwissMango™ is an online software with unparalleled ease of use. It allows you to maintain your website without waiting on your webmaster for time-consuming, expensive updates. If you can send an email or use Word, you can update your website. With easy to follow instructions every step of the way SwissMango makes it that simple.

***Log in, update, submit, done!***

### Standard Features

#### Unlimited Pages

You can create as many pages as you would like. As your organization and needs grow, so can your website.

#### Navigation Management

Create and update your website's navigation and sub-navigation in seconds. It's simple to use allowing anyone to make updates, regardless of experience.

#### Text Editor (In-Page Editing)

Add text to your pages, change your text style, add images, and much more with an interface similar to MS Word. This in-page editing capability allows you to edit, update and make changes in real-time.

#### Resource Library

Upload pictures and documents directly from any computer, right into an online library. They then become available for immediate use anywhere on the website.

#### Photo Galleries

Insert an indefinite amount of images on any page. Photo galleries instantly create thumbnail images that become larger in a light box format within the same page when selected, allowing you to cycle between the images as well.

#### Document Galleries

Add documents anywhere on your site and make it easy for your visitors to obtain all the documents they need. You can choose to upload them from any computer to the resource library allowing you to have access to your documents from anywhere in the site.

#### Calendar Events

Post all of your events in an easy-to-read calendar. Add events at any time and include a detailed description. You can add a module that allows you to accept and manage your RSVPs online.

#### News Articles w/RSS

Add news articles or press releases to your site to keep your visitors informed about the latest happenings in your business/organization. It's easy to add your news and then select the articles you want to make public.

#### Form Builder

Create contact us forms, put surveys together, collect information from your visitors, have them sign up for newsletters or have them register for a promotion. It can also be used in combination with the online payments module.

#### Slideshows

Display images on your pages with the slideshow. After you add your images, the slideshow transitions from one image to the next.

#### Google Maps

Create an interactive Google Map on any of your pages. Your visitors will be able to get driving directions to the designated location.

#### Spotlight Column

Add announcements to your site, post advertisements, add images or create quick links to emphasize a specific page of your website.

#### Password Restricted Pages

*Viewing:* Create pages or sections of your site where only certain users can view specific content. This feature is great for organizations who would like a members only content area.

*Editing:* Assign page-specific permission to your content editors. Great for organizations with multiple departments that need control over their own sections.

#### Video Galleries

Enhance your site with video. This feature allows you to take videos from YouTube and organize them in galleries. Simply copy the link from YouTube and paste into the gallery.

#### Spotlight Ads

Have your website generate revenue by offering ads in the spotlight column. The ads will be randomly selected each time a visitor accesses a page.

#### Spotlight Events

Highlight events in your spotlight column. This brings the event to the forefront of your website and encourages visitors to attend your events.

### Add-on Modules

#### eNewsletter

Create eNewsletters to send to contact groups. Within your eNewsletters, you can include text, pictures, documents, news and RSVP for events. The scheduler allows you to setup your eNewsletters in advance. You also have the ability to track statistics.

#### Events RSVP

Allow RSVPs online with optional closing date, set a maximum number of attendees allowed, schedule email confirmations of reservation to be sent to attendee and/or event coordinator and make RSVP lists viewable.

#### Online Payments

Customers can submit online payments seamlessly without leaving your site. An email confirmation is sent to the customer and a specified person in your business or organization. All major credit cards are accepted.

#### Online Store

Sell products with detailed descriptions and photos. You can accept payments, generate statistics for inventory and track customer sales history. Set in a secure environment, all of your visitors' information is secure and confidential off site with the credit card processor.

#### Members

Create member directories listed by name, company and/or category.
