**\$184/month**

**Adopt-A-Classroom:**

The SwissMango Adopt-A-Classroom module allows parents and businesses within your community to adopt specific classrooms online. You set the dollar amount for classroom adoptions, promote the program, and seamlessly provide your local teachers with much needed classroom support.

**Fund-A-Project:**

Using this module, teachers can request funds for projects from parents and businesses within the community to help fulfill their individual classroom needs. It's a virtual wish list that allows donors to instantly fulfill a classroom need with just a few key strokes. It couldn't be any easier.

**Community Opportunities:**

This program can be used by business, non-profit organizations, and schools within a community to post opportunities such as student internships, volunteer opportunities, scholarships, and teacher externships. In addition, businesses can post offers of equipment, materials, and guest speakers for your local schools. Your teachers can also make requests from the community. It's a one-stop-shop clearinghouse of opportunities for your local students and teachers.

**Advantages:**

- Data stays with you. Not in third party's system.
- Emails stay with you. Not in third party's system.
- Payments stay in your system and go directly into your bank account with a seamless transaction.
- In-Page editing. No cumbersome back-end system.
- All Features and Modules are seamlessly integrated and use the same building tools.
- No minimum time commitment.
